

AREKANTI HANOOK

+91 8374452071 arekantihanook123@gmail.com LinkedIn GitHub Portfolio

SKILLS

Languages	Python, C++
ML/AI	NLP, Deep Learning, LLMs, RAG, Graph Neural Networks
Frameworks	PyTorch, Transformers, LangChain, spaCy, FAISS
ML Engineering	Model Deployment, API Development, Inference Optimization, Data Pipelines
Tools	Git, Docker, Postman, Linux, Jupyter, VS Code
Databases	MongoDB, MySQL

EXPERIENCE

IQVIA Technologies

Aug 2025 – Mar 2026

AI/ML Engineer (Trainee)

Kochi, India

- Architected and deployed end-to-end AI automation pipelines using NLP and LLMs, reducing manual processing effort by 90%.
- Designed scalable data extraction systems from unstructured documents using GPT-based models, improving accuracy and processing throughput.
- Optimized LLM inference pipelines via prompt engineering and retrieval tuning, reducing latency and improving response consistency.
- Built production-ready AI systems with logging, monitoring, and error handling, ensuring reliability in real-world workflows.
- Implemented data validation and post-processing pipelines while collaborating with cross-functional teams, improving output quality and operational efficiency.

FastPix Solutions Pvt. Ltd.

Apr 2025 – Jul 2025

AI/ML Developer Intern

Hyderabad, India

- Developed data preprocessing and transformation pipelines, improving data quality and readiness for machine learning models.
- Implemented missing value imputation and data cleaning techniques, enhancing dataset reliability and overall model performance.
- Analyzed production datasets to identify inconsistencies and collaborated with engineering teams to improve data workflows and pipeline efficiency.

PROJECTS

AI Medical Assistant (LLM + RAG System)

- * Architected and deployed a production-grade conversational AI system using RAG, enabling context-aware medical responses with persistent memory.
- * Designed a FAISS-based semantic retrieval pipeline, improving response relevance and reducing query latency.
- * Integrated LLaMA.cpp and BioBERT for domain-specific NLP, enhancing medical entity recognition and clinical query understanding.
- * Built a scalable FastAPI backend with concurrent request handling, logging, and fault-tolerant API design.
- * Optimized end-to-end inference pipeline through prompt engineering and query enhancement techniques, improving response accuracy and system efficiency.

Tech Stack: FastAPI, LangChain, LLaMA.cpp, FAISS, MongoDB, PyTorch, NLP

Knowledge Graph using R-GCN (Bhagavad Gita)

[Source Code](#)

- * Built an NLP pipeline to extract entities and relationships, constructing a knowledge graph with 500+ entities and 600+ relationships.
- * Trained an R-GCN model using PyTorch Geometric, achieving 94% accuracy in link prediction.
- * Optimized graph processing for sparse relational data, improving model generalization and inference performance.
- * Developed visualization tools using NetworkX, enabling efficient graph exploration and reducing manual analysis effort by 80%.

Tech Stack: Python, PyTorch Geometric, spaCy, NetworkX, NLP, Graph ML

EDUCATION

National Institute of Technology Jamshedpur

Master of Computer Applications (MCA)

India

2022 – 2025

ACHIEVEMENTS

- * Solved 250+ DSA problems across coding platforms.
- * Ranked 357 in CodeChef Div4 contest among 25,000+ participants.
